

Assembly

Industrial Screw Feeders handle a variety of powders, flakes, granules, pebbles, chips and pellets in every major industry... foods, plastics, chemical, mineral, and pharmaceutical. The complete standard of ISC Industrial feeders are ruggedly designed to meet the rigorous challenges of every operation.

Every Industrial Screw feeder utilizes an internal conditioning ribbon. Large Diameters are used to increase desired outer circumference speeds to assist in preventing bridging or rat holing. Screw flights are filled uniformly to assist in increased accuracies. Typical accuracy ranges are plus or minus 1/2" to 1% for most products. All accuracy may be subject to testing.
